

No.5 PLUS Antifouling

Premium Copper Based Ablative Antifouling

When you need an extra shield of protection!

No.5 Plus is the high performance self-polishing antifoul for those tougher conditions.

PRODUCT FEATURES

- Built and engineered on our proven performer No.5 Antifouling
- Highest biocide loading for ultimate protection
- Superior resistance to fouling in static conditions
- Ultimate protection for cruisers in the South Pacific
- High performance self-polishing ablative technology

The printed colour examples shown are produced using different technology than that of a paint finish and are therefore not necessarily a true depiction of the actual product.

Please contact your representative for a true colour sample should you require one.

PRODUCT USES

No.5 PLUS is the solution to the ever increasing fouling burden in nutrient rich waters

Designed for the pleasure marine sector, to provide owners with a dependable, high performance coating system that will save them money in maintenance costs.

It is recommended for yachts, launches, tenders, dinghies and trailer yachts, No.5 PLUS will typically provide 22-26 months protection.* (based on two spray applied coats).

Not suitable for use on aluminium craft, outboard motors, sail drives or stern legs.

* Durability will be determined by film thickness applied, frequency of use, water conditions, tidal flow and many other variables
